### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

#### **Listing of Claims:**

Claims 1-4 (Canceled)

Claim 5 (Currently amended) A method comprising:

determining groups of chromaticity corrections, ~~each group~~ corresponding to red, green, blue, cyan, magenta and yellow regions of color in a linear device-dependent coordinate space associated with an output device;

applying ~~each~~ group of the chromaticity corrections to device-independent coordinates throughout the said corresponding regions of color to produce chromatically corrected device-independent coordinates; and

displaying colors on a display based on the chromatically corrected device-independent coordinates.

Claim 6 (Currently amended) The method of claim 5 wherein determining ~~groups of~~ chromaticity corrections further comprises calculating correction factors corresponding to each region of color that are piecewise linear correction functions within the corresponding regions of color.

Claim 7 (Original) The method of claim 6 wherein each piecewise linear correction function operates on the linear device-dependent coordinates within the corresponding region of color.

Claim 8 (Original) The method of claim 7 wherein the linear device-dependent coordinates comprise linear RGB coordinates.

Claim 9 (Currently amended) The method of claim 5 wherein determining groups of chromaticity corrections further comprises ~~includes~~ calculating a set of correction levels, wherein the correction levels correspond to adjustments to the hue, saturation, and brightness for the corresponding regions of color for ~~each group of~~ the chromaticity corrections.

Claim 10 (Original) The method of claim 9 wherein the device-independent coordinates comprise coordinates in tristimulus space.

Claim 11 (Original) The method of claim 5 wherein the device-independent coordinates comprise coordinates in chromaticity space.

Cancel claims 12-39.
